SUMMARY

The video showcases creative DIY learning activities using plastic Easter eggs, designed for children aged 3-8. It includes various educational games that focus on literacy, math, and color matching, making learning fun and interactive during the Easter season.

- *Activities are tailored for two age groups: 3-5 years and 6-8 years.*
- *Includes a scavenger hunt as part of the Easter celebration.*
- *Features a matching game to help kids learn sounds and letters.*
- *Introduces time-telling exercises using plastic eggs.*
- *Encourages math practice with addition and subtraction activities.*
- *Suggests using eggs for color matching and other basic concepts for younger kids.*
- *Invites viewers to share their own activity ideas and feedback in the comments.*
- *Promotes community engagement through a hashtag for sharing activities.*

I had it Easter weekend and we decided to do some fun activities with the kids all using the plastic eggs that we were leftover in and we said to creating something restraining some fun DIY learning activities and that's just what we've done in this video we'll see - all of interest to create the best learning activities that you can create out an egg shell so you don't need to do that so here are some fun activities for 3 5

rolls and some for six to eight year-olds and the six to eight year-olds are all concepts they're learning right now so will be a lot of fun and we also did an Easter scavenger hunt for the kids you can watch the video right here don't forget watch that and of course you can totally borrow the blues so let's get started with making our own Easter learning twini's mat one Vidia has been with the momma because it's all come down to jungle

they've all been lost which one is this and s makes what's up okay and then [Music] it was he today and what sound is Amy do you basically keep rotating this for the kids to learn the right sounds and to match the alphabets together

[Music] says gee is that matching [Music] you guys the onions burning all of our time and we thought we'd mix me selectivities missing players it works this time 650 is imagine 650 to the clock 650 [Music]

Tyler club and yep well done now onion you said much occasions very fun so we've actually written the times here and we've given lots of multiple answers you need to tell me which is the right one time you need 16 mmm and then $1/2$ times n is 4

well I'm saying this one we're gonna do now a few thousand ten plus ten is two so where else do a Finnish team so twenty sixteen plus four is twenty you can also use these to create opposites or any other concept Euclid is currently learning it Oh kids are currently reading use it to learn C

letter words or retrieve errors or create new ones we could also use for younger kids to match colors yes thank you so much for watching and wish you guys a very very happy Easter and if you loved all of these activities please do leave em in the comments below if you come up with any of your connectivity's and please do share them and to share with us by hashtag KSP TV that's right here and yeah we look

forward to your feedback if you have any ideas we want us to shoot then again leave them in the comments below and please please do subscribe [Music]
