SUMMARY

The comedian humorously explores the absurdity of using feet as a unit of measurement, particularly in relation to physical attributes like legs. He shares personal anecdotes and societal observations, blending humor with commentary on masculinity and measurement standards.

- *The speaker's father is characterized as a "legs guy," highlighting a humorous stereotype about men's preferences.*
- *The absurdity of using feet as a measurement is emphasized, questioning its origins and practicality.*
- *The joke about horses being measured in hands contrasts with the use of feet for humans.*
- *A comedic narrative about the evolution of measurement standards suggests insecurity among men influenced the creation of smaller units like centimeters.*
- *The speaker shares a personal story about measuring his own anatomy with a dollar bill, adding a humorous twist to the topic.*
- *A playful suggestion is made to feature Donald Trump on the \$1 bill to humorously address size perceptions.*

My dad's a legs guy. You know with men, they say men are either like a legs guy, a butt guy, or a boobs guy. And I know it's offensive to minimize men like that. >> [laughter] >> But if my dad sees a tall woman, he's like, "Son, >> [snorts] >> she's got legs for days." Because that's the only way you can measure legs in this dumb [_] country of ours. Legs for feet sounds like a horror movie.

>> [laughter] >> As Americans, I think you should take one moment every day to reflect just how dumb it is we still use feet as a unit of measurement. That's just some GUY'S FOOT ONCE. >> [laughter] >> BUT WE STILL USE IT FOR FOR VERY IMPORTANT THINGS, EXCEPT HORSES. >> [laughter] >> If you don't know, horses measured in hands. That's right. >> [laughter] >> Feet, hands.

At some point they must have tried. >> [laughter] >> They must have tried measuring things in [_] I bet you they did, and I can tell you exactly what happened. No one could agree how long one [_] should be. >> [laughter] >> I'm sure at first they went with the average. That makes sense. But then the bottom half of men stormed the capital and were like, "WHAT THE [_] MY [_] IS ONLY HALF A [_] THIS IS NOT GOING TO STAND."

SO THEN, THEY HAD TO MAKE THE [_] SMALLER and smaller until no man felt insecure, and that's how we got the centimeter. >> [laughter] >> All I ever wanted was 6 in. God, I used to spend every night in high school measuring my dick with a dollar bill. >> [laughter] >> And do you do you know do you know why a

dollar bill? Because cuz they're they're pretty much 6 in and rulers don't curve and >> [laughter] >> I've spent hours of my life dick slapping George Washington in the face and >> [cheering and applause] >> he'd be looking back at me like I cannot tell a lie.

>> [laughter] >> You're a buck short. >> [applause] >> That's why look I'm no fan of Donald Trump but I would love to get him on the \$1 bill. Cuz then no matter how big you are he'd be like huge. >> [laughter] [applause] >> That joke will be funny when he's not president in 12 years believe you me. You have my word.
