- *The review emphasizes the seamless integration of fun and education in the game.*
- *Viewers are encouraged to subscribe and engage with the channel.*

hi guys today we're going to review a new game and it's by clever cubes they drink one of my favorite innovators for games especially for the toddler & preschooler segment this one is for children who are just about learning how to count it's between the age group about two two and a half to work for four and a half years old and this one is called spot the dots you will not even realize how seamlessly they've

integrated the whole playing counting and fun learning or together in this game so before we get into how to play the game this game is priced at rubys 415 is available at all leading east ores and you can of course check for their website details in the comments below but right now let's gets traded or how to play the game so this is what the box contains a board like this which is something in the front and at the back

you have your object cards which is the number of objects on each of these cards then you have a numerical and you have a number so finger counting and of course you have some buttons to add some fun now if you look at this cow carefully it has only one spot and therefore the child is supposed to take one object card place it this way one number card place it here one finger card place it here and then because gets

you correct he also puts a button to go match the spot now to explain to you with a slightly more difficult number on teaching the child how to round here is another example so let's count how many Cup how many spots does the cow have [Music]

if you like the videos and don't forget to subscribe like and leave your comments below we look forward to them
