[Music] hello everyone welcome to a new video on Kitster press com and if you haven't subscribed to our YouTube channel then make sure that you do right away a lot of moms commented and asked us that what is it that I really carried in my makeup bag and I thought that we could actually make a great video because really there's nothing special that I really carried my makeup bag except the fact

that i carry lots of things in my makeup bag here is the big one the pouch and if you're wondering whether I get it from then don't forget to check out our video on what's in my bag because that's exactly what you will get it from and in the description below and now we're going to empty it to see what's inside okay so here's without all nice clean and empty and we've emptied of everything and I'm going to take you

through all the stuff that I carry in this bag this is my wonder product this is my hand cream and I feel this is one thing that just instantly gives me a mood lift and makes me feel so good and fresh so I always carry this mini of my hand cream which works really well I always been doing up my eyes more than my lips so I always carry this cool powder which is gonna leave in a sparkle

in it you know it's a shimmering loose powder but it works well on top of the eyelashes I'll it so here is what it looks like here is the mascara I use the Maybelline the falsies volume Express I think this works well for day and night if I need to use it during the day which I always do because I p mascara is one underrated Prada my Maybelline closer kajal I absolutely love this product and I don't know how many spares I have of

this you don't also need to sharpen it right it's always up roll and use so that makes it very very easy then we

have a blush and a brush I've got a one which is like a blush with a little bit of shimmer and it's more day so again this is you know as per your skin guy between a cup of course speaking choose what works for you and a chapstick which is slightly tinted and i love the boat

bees because its nickel free and i'm allergic to nickel so this one works really well my mac lipstick which is a nude shade which again works very well because if you're not a bright flicks person like me just will be something that could really help some girl but and this is often in case your kajal has you know kind of smudged or spread or the lipstick is spread but this with the moisturizer is a quick fix safety pins

you can never have enough of these and I always feel like you should definitely carry two in your bag or mirror and a comb so this goes like a really tiny size I also use the comb to comb the kids hair often in the car because as always if you're running late then it helps a little bit of a fancy clip in case you know you don't want to just do away with the basic ones but i always

prefer carrying these basic clips in my makeup bag because you might want to change your hair or hair do from day to night a pair of earrings which you'll love and which suit you you know they're pretty nude and natural so they kind of go with everything that you wear so this is something that I absolutely love and I know that this will go with everything like any dress western Indian whatever it is I know that these were kind of

save in case I feel like something's missing and clicks for the kids so more Clips a tiny size perfume which I feel is again warning tonight thing where you suddenly want to make it feel like also affect I think this one really really helps so that's what comes all in this little bag I'm not a very very makeup faucet but what I do like caring is the absolute basics and something that makes me feel good I think it should just be

that hope you like a little makeup pouch video and don't forget to subscribe to our YouTube videos and share it [Music]
