SUMMARY

The discussion focuses on the operational setup of Millennium and explores whether it could effectively run on managed accounts, considering the high volume of transactions it handles daily. Alternatives to managed accounts are also examined in the context of operational efficiency and scalability.

- *Millennium processes approximately 2 million transactions per day.*
- *The feasibility of running Millennium on managed accounts is questioned due to operational complexities.*
- *Managed accounts may not efficiently handle the volume and speed required by Millennium.*
- *Alternatives to managed accounts are considered to improve scalability and operational efficiency.*
- *The importance of maintaining robust infrastructure to support high transaction volumes is emphasized.*
- *Potential risks and challenges associated with transitioning to managed accounts are highlighted.*
- *The discussion includes insights on regulatory considerations and compliance in managing accounts.*

The Operational Set Up of Millennium Could Millennium run on Managed Accounts?

2 Million Transactions / Day: Alternatives to Managed Accounts
